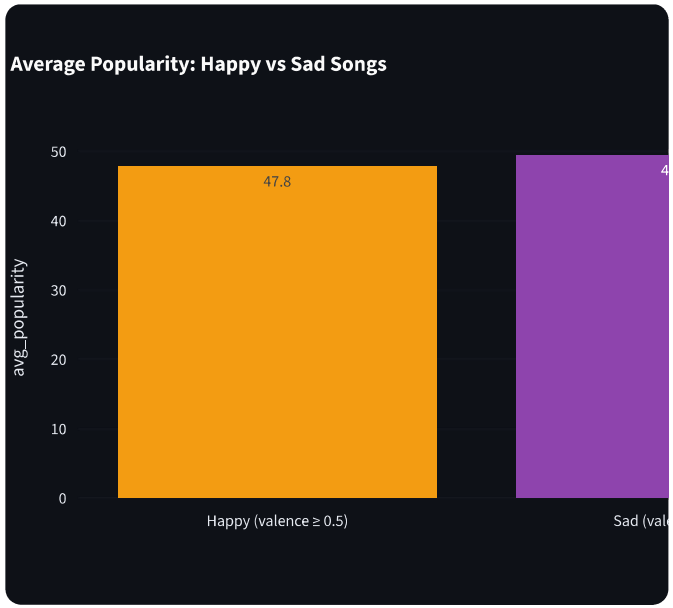
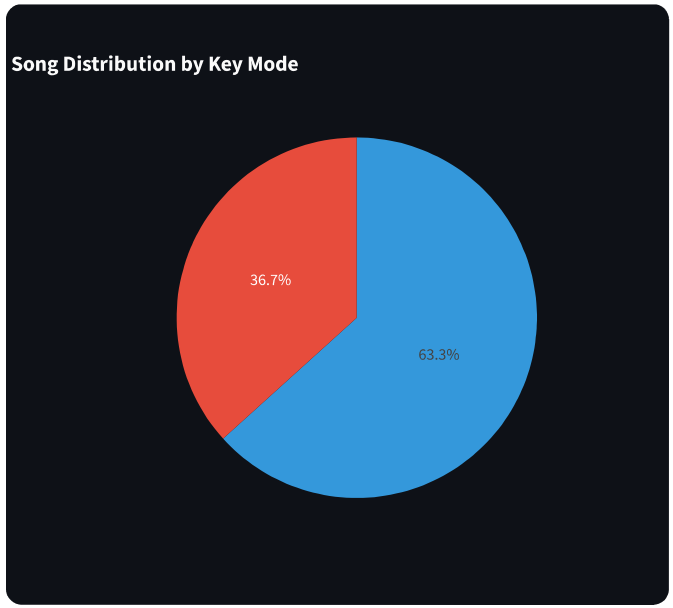
Emotion & Music

Explore the relationship between a song's emotional character and its popularity — some results may surprise you.

Happy vs Sad — Who Wins?

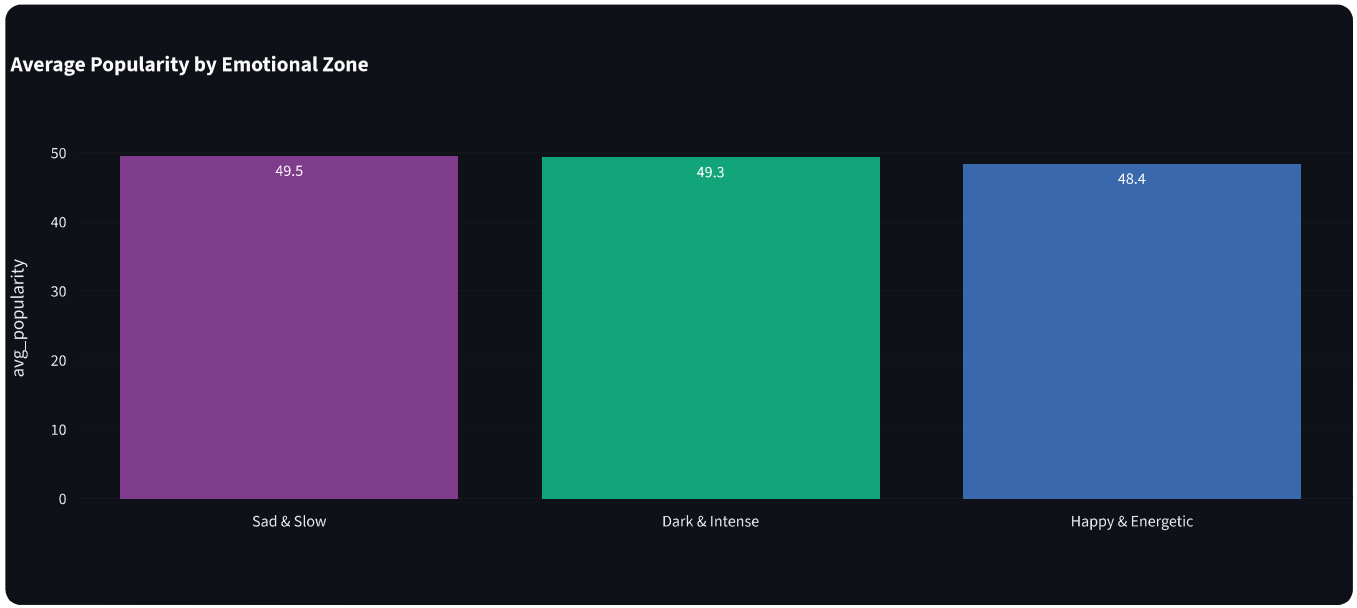


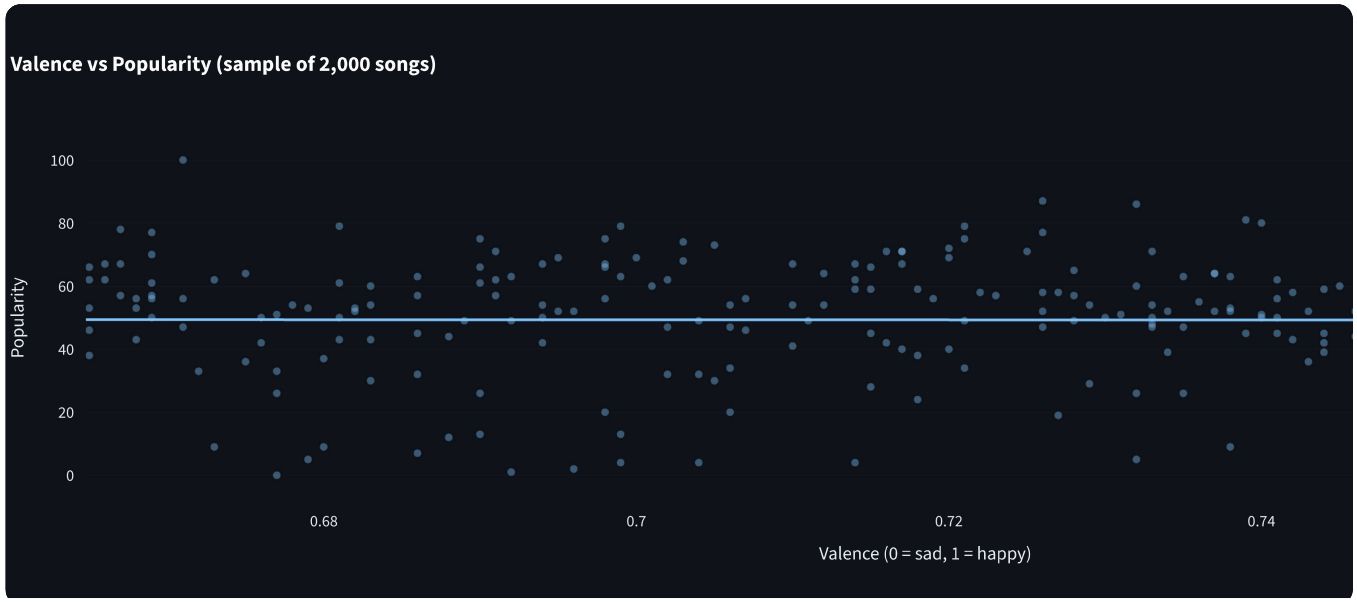
Major Key vs Minor Key



The 4 Emotional Zones of Music

Based on Russell's Circumplex Model of Affect — songs are classified on two axes: Energy (high/low) and Valence (positive/negative)



Scatter Plot: Valence vs Popularity


Each dot represents one song. Unlike bar charts that show averages, this reveals the full spread and distribution of the data.
